Clinical Research by Design

- Parent protocol: an observational study (https://clinicaltrials.gov/study/NCT04806620)
- Covered by a central IRB
- Flexibility to add sub-studies
- Positioned for multi-site trials
- Staffed with a Clinical Data Coordinator

RWD Integration
- Patient-Reported Outcome (PRO)
- Electronic Health Record (EHR)
- Activity Tracker/Wearable Data
- Opportunities to include patients with severe diseases

Precision to the Next Level

- Participants profiled by clinical diagnostic instruments (DePaul Symptom Questionnaire)
- Individual symptom-level data enables precision phenotyping
- Better elucidate responders vs non-responders
- Expedite trial planning, initiation, and targeted recruitment.
