**Solve M.E. and Bateman Horne Center Announce Free Webinar Series:
"Severe ME/CFS: Care, Rights and Research"**

[Salt Lake City, UT] — In a continuing effort to support the ME/CFS community, [Solve M.E.](#) and [Bateman Horne Center](#) (BHC) will launch a groundbreaking four-part webinar series titled, "**Severe ME/CFS: Care, Rights and Research.**" This free online series is designed to provide education and support for individuals living with severe ME/CFS, as well as their caregivers.

Overview

ME/CFS (myalgic encephalomyelitis/chronic fatigue syndrome) is a chronic illness marked by profound fatigue and a range of other debilitating symptoms that can significantly impact individuals and their families. About 25% of those affected by ME/CFS are severely ill, often bedbound, and require intensive support for daily living. This series seeks to address the unique challenges faced by delivering expert-led discussions on caregiving, legal rights, medical care and the latest research.

Webinar Series Details

This series will feature a diverse panel of medical professionals, legal experts, researchers, and individuals with lived experience. The webinars aim to provide practical advice and insights into different aspects of severe ME/CFS care.

Wednesday, Oct. 9: Caregiving- This webinar will focus on the essential role of caregivers in supporting individuals with ME/CFS, offering strategies and insights from

experienced caregivers and health professionals on providing effective and compassionate care.

Wednesday, Nov. 13: Legal - Explore the legal challenges and rights associated with ME/CFS. Expert panelists will discuss advocacy, navigating disability benefits and legal protections for patients.

Wednesday, Dec. 4: Medical- Explore insights from healthcare professionals on the unique challenges and strategies involved in caring for individuals with severe ME/CFS, including treatment approaches and navigating the medical system.

Wednesday, Jan. 15: Research- Delve into the cutting-edge research on ME/CFS, where leading researchers will share recent findings, ongoing studies and the future landscape of scientific exploration aimed at finding a cure and improving patient care.

Each session will be recorded and made available for free, ensuring long-term accessibility to these valuable resources. The series also welcomes people with mild to moderate ME/CFS, Long COVID and other infection-associated chronic conditions, as the information shared will have broader applications.

Additional Information:

Each session will be held at 10 a.m. PT / 11 a.m. MT/12 p.m. CT/1 p.m. ET and lasts one hour.

Registration is available at: <https://bit.ly/3Xa4lyW>.

Individuals may register for the series or by individual session.

There is no cost to attend the webinar.
